

GRADUATE SYLLABUS

Graduate Industrial Design		 ArtCenter	
Visualization 4	IND-671	01	3
Hybrid: online and Room 123	9:00am-12:50pm	Friday	25FA
Instruction Method: Hybrid		ArtCenter Canvas: artcenter.instructure.com	
INSTRUCTOR	Name	Jules Moretti	
	ArtCenter Email	jules.moretti@artcenter.edu	
	Availability	By appointment	
DEPARTMENT	Coordinator Contact	Kelli.hornachek@artcenter.edu	
	Zoom ID	https://artcenter.zoom.us/j/9238569762	
COURSE DESCRIPTION			
Visualization Communication 4 (Vis Com 4) is a one-semester (14-week) project-based course designed to bridge the gap between Industrial Design (ID) and Human-Machine Interface (HMI). This course focuses on creating a comprehensive experience by integrating hardware and software through bi-directional communication, culminating in a fully integrated hardware-software prototype with user testing. The course is structured into three key phases: software foundations, hardware introduction, and prototype development. In the first phase, students will master essential programming languages and tools, including JavaScript, React JS with Redux and Routes, and React Native for mobile applications deployable on iPhone and/or Android phones. They will begin hands-on project preparation. The second phase introduces hardware prototyping with Arduino and explores WebSocket communication for real-time interaction, alongside Human-Machine Interface (HMI) documentation concepts to design intuitive user-device interactions. The final phase focuses on developing a second half-term hardware-software prototype project, where students will apply their skills to create, test, and present an integrated solution. This includes developing testing plans, conducting user testing, and refining the prototype with Arduino, React UI, and HMI documentation. Throughout the course, students will engage in individual and collaborative projects, with regular critiques and feedback, leading to a final presentation of their prototype. Prerequisites: This course is open to graduate students in Industrial Design or related disciplines.			
PROGRAM LEARNING OUTCOMES			

The Program Learning Outcomes for the Master of Science in Industrial Design are designed to produce integrated abilities and levels of experience enabling graduates to confidently and effectively apply innovation methodologies to research and develop new value/solutions that balance the related humanistic, technological, and business dimensions for myriad complex unstructured problems (innovation contexts) including abilities to:

PLO 1: Systems Thinking

This course emphasizes end-to-end product integration, from hardware (Arduino) to software (React/JavaScript) and HMI documentation, aligning with the need to think in systems.

PLO 2: Human Centered Research

The focus on HMI documentation and interaction between users and devices ensures that students consider the human-centered aspects of design and user experience.

PLO 3: Critical Thinking & Problem Solving

By introducing bi-directional communication with WebSockets between software and hardware and having students integrate hardware-software prototypes, your course fosters critical thinking and problem-solving skills.

PLO 4: Quality of Execution

Students are evaluated on the technical implementation of their projects, including clean code, functional prototypes, and well-documented processes. This speaks to the quality of execution expected in the program.

PLO 5: Strategic Thinking

In applying the end-to-end learned processes to existing Industrial Design projects, students practice strategic thinking, integrating multiple facets of design, technology, and user interaction.

PLO 6: Professional Practice

The course grading criteria, which include communication skills and professional presentations, ensure students practice professional skills essential in the industry.

COURSE LEARNING OUTCOMES

1. **Develop Proficiency in JavaScript and Related Tools:** Gain a deep understanding of JavaScript and its ecosystem, including essential tools like Node.js and React, enabling the creation of dynamic and responsive web applications.
2. **Develop Front-End Solutions with React JS and React Native:** Learn to build interactive front-end interfaces for both web and mobile applications, utilizing React JS for web and React Native for mobile platforms deployable on iPhone and/or Android phones.
3. **Build Functional Hardware Prototypes:** Learn to design and develop hardware prototypes using Arduino, integrating them with software for real-world applications.
4. **Create and Document Human-Machine Interfaces (HMI):** Develop and document the interaction between users and devices, focusing on designing intuitive and functional HMI for hardware-software integration.
5. **Apply End-to-End Hardware-Software Prototype Development with User Testing:** Synthesize the design process by applying bi-directional communication with WebSockets, front-end development, HMI documentation,

and user testing to create and validate a fully integrated hardware-software prototype.
6. Prepare and Execute Project Testing Plans: Develop and implement testing plans to ensure the functionality and integration of hardware-software prototypes, fostering a methodical approach to project development.
7. Collaborate and Present Prototype Solutions: Enhance collaboration and communication skills through project critiques, group discussions, and the presentation of a fully integrated hardware-software prototype.

COURSE INTRODUCTION	
(see course description above)	
ANTICIPATED SCHEDULE (List themes, topics, projects and major graded events, not all weekly activities)	
1. Introduction to Tools, JavaScript, and React Foundations - Focus: Learn the basics of JavaScript, React components, Redux, Routes, and initial tool setup. - Major Topics: JavaScript fundamentals, React components with JSX, React Redux for state management, React Routes for navigation, and tool setup (Sublime, Homebrew, Dash).	Weeks 1 - 4
2. Mobile Development and Software Project Preparation - Focus: Explore React Native for mobile apps deployable on iPhone and/or Android, and prepare for a software project presentation. - Major Topics: React Native navigation and UI components, project planning, and hands-on development of apps or web interfaces.	Weeks 5 - 7
3. Hardware Introduction and HMI Concepts - Focus: Introduce Arduino with IDE and WebSocket integration, and explore Human-Machine Interface (HMI) documentation concepts. - Major Topics: Arduino setup, WebSocket communication, and HMI design principles for hardware-software interaction.	Weeks 8 - 9
4. Second Half-Term Hardware-Software Prototype Project Development - Focus: Develop, test, and refine a hardware-software prototype project integrating Arduino, React UI, and HMI, culminating in final presentations. - Major Topics: Testing plan creation, prototype development and testing, and presentation of integrated hardware-software solutions. - Major Graded Events: Final project presentation with HMI documentation and bi-directional communication prototype.	Weeks 10 - 14
GRADING	

1. **Project Completion and Technical Implementation (40%)**
 - **Description:** Successful completion of major assignments and projects, including functionality and technical integration (e.g., JavaScript, React, Arduino, WebSockets).
 - **Evaluation:** Graded based on the functionality, completeness, and complexity of the solutions. Projects must meet technical requirements and demonstrate proficiency in tools and processes covered during the course.
2. **Human-Machine Interface (HMI) Documentation and Process (25%)**
 - **Description:** Comprehensive documentation of the Human-Machine Interface for projects, reflecting an understanding of user interaction with the product and its hardware/software integration.
 - **Evaluation:** Graded on clarity, completeness, and thoughtfulness in describing how the HMI supports the user's experience. Must include details on both the software and hardware aspects.
3. **Final Presentation: Verbal and Visual (20%)**
 - **Description:** Final verbal and visual presentation of the end-to-end project, showcasing the design process, prototypes, and how all components (hardware, software, HMI) work together.
 - **Evaluation:** Graded on the quality of the presentation, the ability to clearly communicate the project's purpose, methodology, and final implementation, and the professionalism of the delivery.
4. **Participation and Class Engagement (15%)**
 - **Description:** Active participation in class discussions, critiques, and group activities. This also includes attendance and engagement with peer feedback and collaboration.
 - **Evaluation:** Graded based on consistent class attendance, contribution to discussions, teamwork, and respectful engagement with peers and instructors.

DEPARTMENT GRADING STANDARDS

A final grade is determined based on assessment of each student's performance on average over the duration of the course for #2-7:

- 1. The Resulting Work (Quality)—30 of 100 points**
Subjective assessment of the quality of the work completed for the assignments.
- 2. Level of Effort (Quantity)—20 of 100 points**
The quantity of work, level of complexity and challenge, and/or amount of time and energy evident in the student's approach to the class goals.
- 3. Growth (Positive Change)—10 of 100 points**
Subjective assessment of the change in quality of the student's work, character and/or approach over the term.
- 4. Social skills—10 of 100 points***
Subjective assessment of the "ease to work with" and "value added to the class experience" by the individual student. This includes level of participation in and contribution to the overall state of the community and specific class social and information exchanges like class critiques and generally showing appropriate respect for faculty and class members.

*In the event of significantly poor interpersonal performance, excessively disrespectful behavior to others, or abuse of department resources the instructor may elect to deduct up to 50 points from the total grade.
- 5. Communication Skills—10 of 100 points**
Subjective assessment of relative ability to articulate and communicate in the design process, especially for presentations and client relations situations.
- 6. Intellectual depth—10 of 100 points**
Subjective assessment of a student's grasp of the subject matter, and his ability to articulate and apply the dimensions of the subject matter to his assignments and in-class critiques.
- 7. Professionalism—10 of 100 points**

COST INFORMATION			
REQUIRED MATERIALS OR SUBSCRIPTIONS:	Apple Computer with admin privileges Free Software (Mac): Terminal Sublime Text Editor Homebrew Node.JS Dash Git Arduino IDE 2.3.2 To purchase Hardware: Arduino and other accessories (instructions will provided during class for what to buy)	ESTIMATED COST OF MATERIALS:	\$150
INSTRUCTION/HOMEWORK			
	y	Synchronous Lecture/Discussion	
IN-PERSON AND	y	Synchronous Instruction/	

ONLINE IN-CLASS ACTIVITIES (all that apply during the term)		Demonstration	WEEKLY HOMEWORK :	8+ hours
	n	Asynchronous Lecture/ Demonstration		
	y	Critique/1:1		
	y	Studio time		
	y/n	Lab		

WEEKLY PLAN

WEEKLY PLAN OF ACTIVITY			
Course Name: VIS4		Instructor: Jules Moretti	
Term: 4th		Meeting Location and Time: GradID 9am > noon (3 hours)	
Week	Topic	Class Activities	Assignments
Week 1 Sep 19	Course Introduction and Tools Setup	Course overview, grading expectations, setting up tools like Sublime, Homebrew, and Dash.	Install and configure required tools.
Week 2 Sep 26	Basics of HTML & CSS for Interface Design	Learn the basics of HTML for structuring content and CSS for styling web pages. Discuss semantic HTML and basic layout techniques using CSS.	Build a simple webpage with HTML and CSS, including a navigation bar, content sections, and basic styling.
Week 3 Oct 3	JavaScript Basics and Interactive Elements	Learn JavaScript fundamentals such as variables, data types, loops, and functions. Discuss how JavaScript can be used to make HTML pages dynamic.	Add interactivity to the previously created HTML/CSS webpage using basic JavaScript (e.g., event listeners, DOM manipulation).
Week 4 Oct 10	From HTML/CSS to React Components + React Redux and Routes	Understand how React uses JavaScript to build reusable components with JSX, introduce React Redux for state management, and explore React Routes for navigation.	Convert parts of the HTML/CSS project into React components using JSX, and implement basic Redux state management and Routes navigation.
Week 5 Oct 17	React Native for Mobile Applications	Introduction to React Native for mobile app development, with a focus on creating navigation and UI components.	Introduction to React Native for mobile app development, with a focus on creating navigation and UI components deployable on iPhone and/or Android phones.
Week 6 Oct 24	Project Preparation and Hands-On Work	Prepare for the software project by planning and starting hands-on work on a React or React Native project (e.g., app or web interface).	Plan and begin development of a software project (app or web interface) to present in Week 7.
Week 7 Oct 31	Student Software Project Presentations	Present projects developed during Week 6 (e.g., app or web interface using React or React Native), with peer feedback.	Prepare and deliver a presentation of the software project completed.
Week 8 Nov 7	Arduino + IDE + WebSocket (Reading)	Introduction to Arduino with IDE and WebSocket concepts through reading materials.	Read and explore Arduino + IDE + WebSocket integration concepts.

Week 9 Nov 14	Human Machine Interface aka HMI (Reading)	Introduction to HMI concepts through reading materials, focusing on hardware and software interaction.	Read and explore HMI documentation concepts.
Week 10 Nov 21	Second Half-Term Project Testing Plan	Develop a testing plan for the second half-term hardware-software prototype project, integrating Arduino, React UI, and HMI.	Create a detailed testing plan for the hardware-software prototype project.
Week 11 Nov 28	Thanksgiving Holiday	No Class	No homework
Week 12 Dec 5	Second Half-Term Project Testing Plan	Refine and finalize the testing plan for the second half-term hardware-software prototype project, integrating Arduino, React UI, and HMI.	Refine and finalize the testing plan for the hardware-software prototype project.
Week 13 Dec 12	Second Half-Term Project Development & Testing	Continue development and conduct testing of the second half-term project (20 min check-in, 20 min work/testing).	Continue development and test the hardware-software prototype project.
Week 14 Dec 19	Final Project Presentations	Present final hardware-software prototype projects, demonstrating the integration of Arduino and React UI, and submit the final HMI documentation.	Finalize and submit the end-to-end project.

POLICIES AND EXPECTATIONS

ATTENDANCE POLICY

To complete a course successfully, students must attend all class sessions (unless they are engaged in research or location assignments that have been authorized in advance by the class instructor of the missed class). At the discretion of the instructor, three or more absences may result in a grade of 'N' being entered. Students who miss a class due to illness should discuss the absence with the instructor at the next class meeting. Students who are ill for a week or longer should inform their Department Chair's office of their absence. Updates and current information for all policies listed in the Student Handbook can be found [here](#).

DISABILITY STATEMENT AND ACCOMMODATIONS

ArtCenter complies with the Americans with Disabilities Act, Section 504 of the Rehabilitation Act, and state and local requirements regarding students and applicants with disabilities. Under these laws, no otherwise qualified individual with a disability shall be denied access to, or participation in the services, programs and activities of the College. The Center for the Student Experience has more information on Disability Services, policy and Resources for students. Please see the full Disability Statement in the [Student Handbook](#) for more information.

Students who require disability-related accommodations (academic adjustments and/or auxiliary aids) are encouraged to contact the CSE immediately upon acceptance, after being diagnosed with a disability, and each semester that they are enrolled. For questions regarding student disability support, required documents and the student disability policy, please see the [Student Disability Services](#) page or email CSE@artcenter.edu.

Updates and current information for the Disability Statement and other policies listed in the Student Handbook can be found [here](#).

EXPECTATIONS FOR CONDUCT

ArtCenter is committed to maintaining a civil and safe learning environment, free from bias, coercion, and harassment for all. The classroom is a shared environment where all parties are accountable for behavior and contributions to a productive and supportive atmosphere. We understand that our members represent a rich variety of backgrounds and perspectives and are committed to providing a set of conditions for learning that respects diversity. While working together to build this community we ask all members to:

- Be open to the views of others
- Honor the uniqueness of colleagues
- Communicate in a respectful manner
- Recognize differences in learning, language, approach and ability
- Appreciate the opportunity that we have to learn from each other in this community
- Respect the work and materials of others

All students are expected to abide by the ArtCenter Code of Conduct. All Faculty members, as Employees, are expected to abide by the Employee Standards of Conduct. The full statements of these policies can be found in the Student and Employee Handbooks. To report an incident, please see [here](#) for updates and current policy and procedures for Grievance and Complaints (procedures as listed in the Student Handbook), [Faculty Handbook](#), and [Employee Handbook](#). If you have any concerns or would like to discuss an incident, please contact your Instructor, your Department Chair, the [Center for the Student Experience](#), or the [Office of the Provost](#).

POLICY AGAINST HARASSMENT

The College is committed to providing an educational environment that is free of any kind of unlawful harassment. In keeping with this commitment, the College maintains a strict policy prohibiting unlawful harassment by any employee and by any third parties, such as contractors, visitors, students or vendors. Any harassment on the basis of race, color, religious creed, sex, ancestry, national origin, age, physical or mental disability, medical condition, genetic characteristic, marital status, veteran status, sexual orientation, gender identity, transgender identity or any other characteristic protected by federal, state or local law is strictly prohibited. Examples of such conduct that may violate this policy include verbal harassment, physical harassment or visual harassment. Verbal harassment may include, but is not limited to, epithets and derogatory comments or slurs on any of the bases listed above. Physical harassment may include, but is not limited to, assaulting, impeding or blocking movement, or physically interfering with the normal work or movement of another, when directed at that individual on any of the bases listed above. Visual harassment may include, but is not limited to, the display or possession of derogatory posters, cartoons, computer images or drawings on any of the bases listed above. Violation of the Policy Against Harassment may result in disciplinary action, up to and including suspension or dismissal. Updates and current information for all policies listed in the Student Handbook can be found [here](#).

TITLE IX STUDENT POLICY AND PROCEDURE

ArtCenter does not discriminate on the basis of sex, gender or sexual orientation in its education programs or activities. ArtCenter complies with Title IX of the Education Amendments of 1972, and certain other federal and state laws, which prohibit discrimination on the basis of sex, gender, or sexual orientation in employment, as well as all education programs and activities operated by the College (both on and off campus), and protect all people regardless of their gender or gender identity from sex discrimination, which includes sexual harassment and sexual violence. For more information, please see the [Notice of Non-Discrimination and Policy Statement](#). Further contact information, policies and procedures, complaint forms, and other resources can be found on the [Title IX webpage on the main website](#).

PARTICIPATION IN ONLINE PLATFORMS

Students will use their personal digital devices to connect to their instructor and peers using the College's Learning Management System ArtCenter Canvas. All remote-learning technology will be embedded within ArtCenter Canvas. Weekly course sessions for online courses will be taught live online by instructors according to the date and time scheduled. (Note: online sessions may be recorded by the instructor for student reference. Recordings that are posted to ArtCenter Canvas are accessible only to those students enrolled in the course. Any Class Recordings held in the Zoom Cloud will be destroyed at the conclusion of the course.) Student participation on the digital platform is required for online course delivery and asynchronous use; if a student has difficulty with access to an appropriate digital device (which has a reliable camera and microphone), or internet access, students should contact the instructor directly, and also notify the department chair. Students who are in conditions that prohibit synchronous participation during the scheduled class time may access course recordings and their attendance will be noted at that time of course access. Note: students are allowed to attend and participate in online classes with their video cameras turned off for some of the class time; instructors and students should clarify expectations regarding use of cameras for the course in light of potential broadband or privacy considerations. Instructors of online classes longer than 1 hour should announce formal breaks and permit students to temporarily disengage for their

CONSENT TO BE RECORDED

In proceeding with any online components of this course, I understand and agree that my voice, image, and Works will be live-streamed and recorded, and that the recordings may be accessed by the course instructor, by the teaching assistant (if any), by the students enrolled in the course, and by any ArtCenter employee who may need access for technical purposes. In enrolling in this course and in accessing this course material, I agree to comply with ArtCenter's Intellectual Property Policy, and in this regard, I understand that all faculty-created Works remain the property of the faculty, and that all student-created Works remain the property of the student. I understand, though, that ArtCenter cannot be held responsible for infringement of intellectual property. I also understand that ArtCenter is the owner of the class recording itself, and everyone, including faculty and students, is prohibited from utilizing the recording for any purpose beyond this particular class during this term. Any questions should be directed towards the ArtCenter Help Desk (helpdesk@artcenter.edu).

TECHNOLOGY NEEDS

For this course you'll need: A desktop or laptop computer, OR a tablet with video and audio recording and playback capabilities with an updated Chrome or Firefox browser. A built-in camera and microphone to record yourself for your assignments, OR a mobile phone to send recordings to your computer/tablet to complete assignments.

Students entering this course/program must have access to the internet for synchronous engagement during scheduled course times. ArtCenter provides access to continual software updates for programs that are supported and required (email, Zoom, etc...). Visit the [IT page](#) on Inside.ArtCenter for software downloads. Please plan to have: Your computer with Zoom downloaded, internet access established, and any other technology ready by the term start date. If you still need help after reviewing the Zoom download directions, please contact helpdesk@artcenter.edu for more assistance. If you have technology needs or concerns, please

ARTCENTER CANVAS COURSE ACCESS AND USE

Students enrolled in this course are able to access the corresponding course site on ArtCenter Canvas for announcements, course content, information about assignments and projects, weekly discussion forums, review of grades and progress, and other reasons. The ArtCenter Canvas course site for each course is listed at the top of the page when logging into [Inside.artcenter.edu](#) and ArtCenter Canvas can also be accessed under Academics > Online Learning > ArtCenter Canvas. Students enrolled in the course can also [access ArtCenter Canvas directly](#) (<https://artcenter.instructure.com>) for current courses.

Click here for [ArtCenter Canvas information](#) for students. Specific instructions for 'how to use' the different assignment functions and features to post your work, participate in weekly discussion forums, check progress, etc can be found inside the course site. If you have any technical issues while using ArtCenter Canvas, you can contact tech support via chat or phone 24/7 by clicking the Links & Assistance icon in ArtCenter Canvas.

HELPDESK AND TECHNICAL SUPPORT

There is 24/7 Canvas support available for all students, faculty, and staff. If you have any questions about Canvas features or technical difficulties with the platform they can assist immediately and escalate to ArtCenter if needed. They can be reached by chat or phone by clicking the Links and Assistance link in the ArtCenter Canvas menu.

The College's IT Help Desk offers information on its campus portal, Inside ArtCenter, that include documentation, helpful tips, and video tutorials on FAQs. Requests for assistance are handled by phone, email, remote access, and virtual meetings. The Help Desk provides first-level technical support to all constituents including staff, faculty, and students. The Help Desk is staffed to respond to technical inquiries during ArtCenter's business hours, with extended technical teams providing support outside of business hours, such as Computer Labs and Audio Visual for classroom technology support. It operates 8:00 a.m. – 10:00 p.m. PST, Monday through Friday, and 9 a.m. – 4 p.m. PST on Saturdays. To contact the Help Desk, please email Helpdesk@artcenter.edu.

STATEMENT OF ACADEMIC AND CREATIVE INTEGRITY

Academic and creative integrity is essential to personal and educational growth of students, which all members of the ArtCenter community are expected to uphold. This value maintains the standards of excellence of the College and creates a meaningful learning environment. A violation of the Academic and Creative Integrity Policy is defined as misconduct including but not limited to plagiarism, creative dishonesty, multiple submission of the same work, cheating, unauthorized collaboration, misrepresentation of ability, sabotage, falsification of records, and complicity in any of the above. The full Academic Integrity Policy and any updates and current information for other policies listed in the Student Handbook can be found [here](#).

CITATION AND IMAGE ATTRIBUTION

Throughout this course, you may be asked to source images and assets, as well as write a paper. To maintain academic and creative integrity, it is important that you provide citation information referencing other people's artistic and written works when you submit your assignments in ArtCenter Canvas. Please check with your professor to see what citation style guide (e.g. APA, Chicago, MLA) you should use. If your professor has no preference, the Library and Writing Center suggest you use MLA. Contact the ArtCenter Library or the Writing Center for resources or support.

GRADE POINT DESCRIPTIONS

Grades are considered FINAL when submitted by the faculty and can only be changed to correct an error in grading or to change an official Incomplete grade to a final grade. Students CANNOT submit or redo work after the end of the term unless an official Incomplete has been approved. The deadline for changing an Incomplete grade is Friday of Week 14 of the term following the term when the course was taken. The deadline for changing an incorrect grade is Friday of Week 6 following the term when the course was taken. Updates and current information for grading and related policies as listed in the Student Handbook can be found [here](#). ArtCenter uses the following grading system:

A 4.00 points	C+ 2.50 points	D- 0.75 points	N 0.00
points (Non-attendance Failure)			
A- 3.75 points	C 2.00 points	F 0.00 points (Fail)	U 0.00
points (Unsatisfactory)			
B+ 3.50 points	C- 1.75 points	S 0.00 points (Satisfactory)	P 0.00
points (Pass)			
B 3.00 points	D+ 1.50 points	I 0.00 points (Incomplete)	W 0.00 points
(Withdrawal)
